May 4, 2018

To Whom It May Concern:

For over 20 years, Insurance for Students Inc. has had the distinct pleasure of working with Keiser University/Keiser College students, faculty and administrators on a daily basis by administrating various student health insurance plans. Keiser University takes an active role in making sure their students are both properly covered and provided supportive service, which has allowed our programs and partnership to enjoy a high level of success over the years.

Having just celebrated our 40<sup>th</sup> year in business in the Ft. Lauderdale – Boca Raton region, we've been lucky enough to have a front seat to the tremendous effect Keiser University has had on the community. From the University's dedication to providing relevant, quality education and making it accessible to everyone in the state of Florida and beyond with their online programs to their involvement with the community, Keiser University continuously works to empower their students. In the ever-changing world of education, this philosophy and dedication should always be in demand and this clearly shows with the incredible growth the university has enjoyed over the years and number of students and families whose lives have directly benefited.

Whether we are visiting one of the Keiser University campuses or at our local health facility, we find Keiser University students and graduates to be well prepared for their selected fields with a level of professionalism to match. When a position in our organization becomes available Keiser University is one of the first places we turn to in an effort to find a good candidate. We have come to know how important it is to Keiser University to provide students with the skills and the knowledge to step right in to a position in their field and succeed.

Should I be able to provide additional information as it relates to my positive experiences and interactions with the Keiser University community it would be my pleasure to speak to you.

Sincerely,

A handwritten signature in cursive script that reads "Craig W. Bode".

Craig W. Bode
