**TO THE**

**2024-2025**

**KEISER UNIVERSITY UNDERGRADUATE CATALOG**

**VOLUME 24, NO. 1, September 23, 2024**

**Effective November 4, 2024**

## **KEISER UNIVERSITY UNDERGRADUATE CATALOG ADDENDUM**

Keiser University continually reviews, improves and updates its programs, courses and curricula. It is incumbent on the University to reflect these revisions in its publications. The following Addendum No. 1 represents additions, changes and deletions to the 2024-2025 Keiser University Undergraduate Catalog, Volume 24, No. 1, and is effective November 4, 2024.

[Pg. 114, Academic Policies, Repeating Courses](#)

After the **Repeating Courses** section, add a new section as follows:

*Allied Health Major Course Repeat Policy*

In the event that a student does not receive a passing grade or withdraws in a major (core) course, the student must comply with all the requirements of the readmissions policy of the Program as well as the re-entry admissions processes of Keiser University, if applicable. The program's class size limitation is contingent upon the number of students actively enrolled, determining the availability of space within a given class.

- Students may repeat the same major course only once. If a student fails the same major course for a second time, the student is dismissed from the program.
- Students may repeat two different major courses; however, a third failure of any course within the major courses results in dismissal, rendering the student ineligible for re-entry into the program.

- For students repeating a major course, they must wait until the course re-sequences, with courses offered only in their normal sequence. If a class is full, an additional waiting period may be necessary for re-entry into the program.
- Due to the restricted access of the program cohorts, Keiser University employs the subsequent procedure to oversee the re-entry into the program:
  - o Priority is given to students with the highest Cumulative Grade Point Average (CGPA) in the major courses.
  - o In cases where multiple students possess identical CGPAs, preference is then granted to those who enrolled earliest into the major program.
  - o Should students exhibit matching CGPAs and enrollment dates, the university has established a point system that will be utilized to determine their placement on the program wait list.
  - o Students electing to re-enter a course must comply with all the requirements of the re-entry, readmission policy of the Program. Due to limited seats for students wishing to re-enter the program in a subsequent cohort the re-entry rubric will be utilized when the number of re-entry students exceeds the number of available seats. The student with the highest-ranking in accordance with the procedure written above will be offered the first open seat, the second highest score secures the second seat, and so on until all seats within the cohort are filled. Any re-entry student who was unable to re-enter the upcoming cohort will automatically go to the top of the re-entry list for the next available cohort offering the course desired.
- Students that wish to transfer campuses must seek permission from the Campus Presidents of both campuses and follow the Course Repeat Policy and Rubric.
- Depending on the duration of a student's absence from the program, a decision may be made to recommend an audit of previously completed courses. This recommendation is founded on the understanding that students may have lost knowledge and skills during their time away from school.
- Re-entry to the core sequence of the program should not exceed more than twelve (12) months since the student's last date of attendance in core. This limitation is established to ensure that the time away does not significantly impact a student's ability to successfully complete academic and clinical requirements. If the period of absence extends beyond twelve (12) months, the student must restart the program from the beginning of the major courses. This measure is implemented to uphold adherence to current industry standards and best practices related to safety principles.
- Financial Aid coverage for course repeats is not guaranteed.
